

SHOWA BLUE FREEZER

FEATURES

- + **Seamless removable acrylic liner**
- + **PVC Coating**
- + **Thickness: 1.5mm**
- + **Length: 30 cm**

The Showa PVC glove is manufactured according to our original process and offers unequalled softness and excellent impermeability, as well as high levels of resistance in the most difficult conditions. The acrylic lining provides comfortable protection against the cold. PVC is the material that provides good resistance to the majority of chemical substances. The glove resists hydrocarbons. It stays supple down to -20°C. The rough finish of the palm allows objects to be held securely and makes handling easier, as well as providing good abrasion resistance. The liner's antibacterial treatment and seamless design eliminate the risk of irritation. Removable liner makes it easier to wash inner liner, and the lifetime of the glove is extended.

OVERVIEW

COATING:
PVC

GRIP:
Rough finish palm

LINER:
Removable seamless acrylic liner

LINER:
White

APPLICATIONS:

- Freezer work and cool stores
- Farm use
